

FIRE 5.0

Test Automation

Framework

- ▶ Comprehensive testing automation coverage and efficiency of more than 90%
- ▶ Quick and reliable tests for faster time to market
- ▶ AI-powered continuous Quality Engineering platform

Features

Cross Browser Support

Cross Platform Support

Supports Web/Mobile/API Automation

Behavior-driven Scripting

Cloud Agnostic Execution

Detailed Reporting

Exhaustive Gestures and Assertion Support

Highly Customizable

Integration with Continuous Pipelines

Support for Headless Browser Execution

Self-healing

Test Data Heat Map

Integration with Test Management, Defect Management, Project Management tools

Integration with Communication Channels - Slack, Teams, O365

Benefits

Lower costs

Cloud-based Execution for Accelerated Execution

Faster Feedback

Improved test efficiency

Distributed Test Execution

Increased test coverage

Continuous Testing

Ease of Scripting

Enhanced Test Coverage
