

PROFESSIONAL DEVOPS SERVICES FOR A CONSUMER CREDIT COMPANY

Client

Is a consumer credit reporting company. The company collects and aggregates information on over one billion people and businesses

Business Challenges

Migrate disjointed solutions to one simplified solution portfolio of supported offerings and move towards an improved continuous integration/continuous delivery environment.

Solution

- Tavant emerged as a partner of choice for its experience and broad range of support skills for this engagement. We followed a seamless transition to cause no disruption to day to day work. We followed a mix of offshore and onsite engagement to ensure 24*7 coverage and to meet the SLO and SLA's agreed by the customer.
- Sunsetting of license tools like – CQ,CC,TFS etc.
- Tavant gradually moved from being a support partner to a consulting partner where we also recommended on procurement of infra components to ensure business agility and scalability.

Benefits

- Built ARM (Automated Release Management) To automate and streamline build and deployment of various environment while staying in compliance to audit processes.
- 24/7 Remote team providing DevOps Support
- Senior resources of the team are part of key DevOps Initiatives working on POC's.
